Digital Signal Processing Lab: Demo 03

Exercise 05:

$2^{15}-1 = 32767$

```
output_value = gain * y0
    if output_value > 32767:
     output_value = 32767;
    if output_value < -32768:
     output_value = -32768;
```
